

Transporting your Custom Cake

We worked hard to create your custom cake and want to make sure you keep it safe during transport! Support your cake by securely placing your hands underneath the box and avoid putting pressure on the sides or top of the cake box when carrying it to your car. Do not stack anything on top of your cake during transport! That includes other bakery boxes. Place your cake on the floor of your car or in the trunk (weather permitting) to make sure it stays level. Avoid making sharp turns or abrupt stops while driving with your cake. Remove your cake from your car as soon as you can after reaching your destination.
